Now at J. Miller's Old Store, back entrance.

**Trapp's Bake Shop.**  
Hot & White Bread, fresh every day  
3 Loaves of Bread 25c.  
Bakery, Confectionery, Groceries.  
**PHILIP TRAPP.**

## Sporting Notes.

Stony's Senior hockeyists played a practice game in Edmonton on the 19th, with the Concordia College boys, and report having had a good time.

The Collegians returned the visit Sunday afternoon and played our Seniors on local ice. The team the visitors brought out were a little too much for the local stick baddlers, however, as the latter seemed lacking in any semblance of team work. On numerous occasions Andy had the puck down in front of his opponents' goal, but had no team mate near to whom to pass the little disc. The play was fairly clean of any of the roughness which usually characterizes so many games, as the referee kept pretty close tab on the checking and off-side play. On one occasion, when a visiting player refused to accept his ruling, the referee promptly called the game off, whereupon the recalcitrant subsided. There was a good crowd of spectators present, but the playing failed to arouse the enthusiasm of these as it had on the previous Sunday. Stony succeeded in scoring a couple of goals, and succeeded in keeping the visitors down to 2 goals. Stony's star player was absent, as it was the afternoon for his music lesson. A E. Michael was referee; and Electrician Trapp goal umpire for Stony.

Sam Zucht promises to pick up a team of local Has beans and challenge the Seniors to a game on local ice on Sunday afternoon next. This should prove a very interesting contest, in the event of Mr "Chuck" Chesser being one of the players on Sam's team.

The Juniors also are arranging a game with Senior team. Three Junior players made a splendid showing in Sunday's game.

## LOCAL NEWS.

Mr Louie Hennig is at present taking a course in engineering at the Hemphill College.

Miss Noradna and Mr T Shreeves, former residents of Stony, motored up from Leduc on Saturday.

Henry Gabel, Peers, was a Sunday visitor here.

The visiting curlers from the City who played here Sunday afternoon were given a banquet in the evening by local curlers. The spread was made by Albert Oeming, the well-known caterer.

The Tuesday morning train from Vancouver was about six hours late. Commissioner Werner, dean of immigration agents, who expected to preside at a convention in Edmonton that day, was late for his engagement.

There was a good attendance at the Hard Time dance Friday night, in a local hall, quite a number of those present were in costume. The prize for the most appropriately dressed couple went to Miss Margaret Ursel and Mr Max Stackleish. The Rosenthal orchestra supplied good music. An added feature was the step dancing of Charlie Rannels.

The fire brigade had a run on Saturday afternoon last, when an alarm was turned in about 4 o'clock. The fire was discovered in the chimney of a house on Third street west occupied by a butcher. The members of the brigade turned out in full force, but the blaze was extinguished with the aid of hand grenades. Loss small, and covered by insurance.

Local merchants and farmers are now obtaining their summer's ice supply from Mike's Lake, west of town.

Luga Councillors meet in Stony Plain tomorrow, Friday, Jan. 27th.

If your eyes bother you, or you suffer from headaches, why not have your eyes attended to by an expert? M M Mecklenburg, eye specialist, will be in Stony Plain on Friday, Jan. 27th.

## Accident to Laborer.

On Friday last, while a crew of loggers who are working in connection with the Poemerl sawmill outfit, north of town, one of the "swampers" named Frank Noyes was noticed to be missing for a short time. On an investigation being made where he had been working, he was found disabled, having apparently been knocked down and winded by the rebound of a small tree while he had been chopping down a big spruce. He was conveyed to the hospital at Onoway, where it was found two ribs on the left side had been broken, and possibly an injury to the left hip bone.

## Government vs. Private Ownership

It does not call for the vision of a seer, or the wisdom of a seventh son of a seventh son, to realize that a battle rages is looming up on the horizon of Canada's national life involving acceptance of one or the other of the two policies noted in the heading of this article. It will be a battle of giants, with not merely millions or tens of millions, but hundreds of millions of dollars at stake.

The initial stages of this gigantic financial battle are now being waged over the subject of control and development of vast water-powers in various parts of the Dominion. In more than one instance these are linked up with schemes of canalization, as, for example, the Great Lakes-St. Lawrence waterways scheme, and the long discussed Georgian Bay Canal project. Although both of these undertakings must be carried out in the East, they are matters of vital interest to Western Canada.

Financial, commercial and industrial interests in Montreal and Toronto may be interested, and more or less directly affected by the deepening of the channels of navigation between the present head of ocean navigation at Montreal, and the head of the Lakes ports of Port Arthur and Port William, but the more vital concern of these financial magnates is centered in and upon the development of the huge water-powers which will be made available as part of this canal construction.

The West, on the other hand, is more concerned about the greater waterways feature and the effect which the deepening of the water channels between the head of the Great Lakes and the Atlantic seaboard will have on freight rates, both by water and rail, on the huge exportable surplus of Western products.

So far as the Great Lakes-St. Lawrence project is concerned, it is not wholly a domestic matter for Canada. It is an international matter, inasmuch as a portion of the St. Lawrence belongs jointly to Canada and the United States, and the construction of the proposed deep canal system will affect approximately forty million of the people of the neighboring republic.

External financial interests, whose real concern is to secure private control of the vast water-powers to be developed, are busy raising the jingoism of United States interference in Canadian affairs, United States control or Canadian resources, and are urging all the possible dangers of entangling alliances. The old, worn-out stock arguments used at the time of the Reciprocity campaign are beginning to be trotted out once more, the Old Flag is to be waved, and all sundry who do not see eye to eye with the financial magnates looking with a covetous eye at this wealth of water-powers are to be classified as traitors to the Dominion.

There is some evidence, too, that, as on former occasions when questions of great national moment were up for discussion and decision, attempts will be made to cloud the real issue by again raising despicable cries of race and creed, and seeking to set one section of the Dominion against another.

Too frequently in the past, with great national policies at stake, the people of Canada have allowed themselves to be swayed by these cries and have been made the victims of their own shortsightedness and foolishness in giving heed to such unworthy appeals. Now that Canada has largely put these things into the background and is moving forward to a development and prosperity unsurpassed in its past history, it is to be sincerely hoped that any and all such ignoble attempts will receive no quarter from the overwhelming mass of the Canadian people; that, as a people, they will put their foot down, and put it down hard, upon any such campaign, the originators of which are the real enemies of and traitors to Canada.

We are not proposing to discuss the respective merits of public and private ownership. But we would most earnestly ask the people of Western Canada to be on their guard, and in the discussions which are bound to take place within the next few years, to keep their minds persistently on the facts of the case, and not be influenced one way or the other by catch cries, sectional, sectarian, or partizan appeals. It is the national good of all Canada, present and future, that is at stake.

## Another Victory For Science

**Danger Of Collapse After Pneumonia Crisis May Soon Be Overcome**  
Forecast of an imminent announcement that medical science had achieved another great victory was made before the Canadian Club at Toronto, by Prof. J. C. McLennan, of Toronto University.

Danger of collapse following a pneumonia crisis, caused by inability of the body to attain requisite temperature, may be overcome as a result of recent observations in the General Electric laboratory in Schenectady, N.Y.

It was recently observed that operators experimenting with a long wave apparatus built for radio suddenly have a tremendous rise in temperature. It soon became apparent that if these waves could be controlled and applied to sodium chloride in the blood there was a marked absorption and the temperature was increased to a given point. It is now believed by application of these waves any known temperature required to destroy different disease-forming organisms can be produced without danger to the patient.

## The Experience of Mrs. Roy Brown is Well Worth Reading

Peterboro, Ont.—"I was in a miserable state of health, my nerves gave way completely. I could not sleep, had back-aches and aches, my appetite was so weak and sleepy and tired that I was compelled to give up and take to my bed. I was advised to try Dr. Pierce's Favorite Prescription, as nothing I had used helped and I took one bottle. I was able to be up and around, I kept on taking it and was completely restored to health. I cannot say enough in praise of the Favorite Prescription for the wonderful help it gave me."—Mrs. Roy Brown, 222 King St. E., Peterboro, Ont.  
All druggists: Tablets or liquid.

## Manitoba Agricultural College Re-Union

400 Ex-Students To Celebrate the Coming Of Age Of the Institution

Friends and ex-students of the Manitoba Agricultural College are preparing to celebrate the coming of age of that institution at a re-union to be held February 16 and 17, for it is twenty-one years ago since the charter class foregathered.

Re-unions come with unfailing regularity in M.A.C. circles, but this one, on account of its historic significance, is to be the daddy of them all. A big committee under the energetic leadership of J. H. Evans, deputy minister of agriculture, is making a special drive to get in all ex-students, particularly those who went through the mill on the old site at Tuxedo, now the military barracks. The first evening of the re-union will be given over to a banquet. Efforts are being made to secure the attendance of Dr. W. J. Black, Montreal, President Reynolds, of O.A.C., and Hon. John Bracken, the three ex-presidents of the college. Mr. Evans estimates that at least 400 ex-Aggies and Household Science graduates will be on hand, every one of them cautioned to leave seriousness at home.

The afternoon of the second day will be spent in visiting the classrooms and laboratories at St. Vital. Students now in attendance at the college stand prepared to take the contest out of graduate athletes who may be harboring any notion that they can still curl or play basketball. A dance at the college will wind up proceedings.

## NO BETTER MEDICINE FOR LITTLE ONES

Is What Thousands Of Mothers Say Of Baby's Own Tablets

A medicine for the baby or growing child—one that the mother can feel assured is absolutely safe as well as efficient—is found in Baby's Own Tablets. The Tablets are praised by thousands of mothers throughout the country. These mothers have found by actual experience that there is no other medicine for little ones to equal them. Once a mother has used them for her children she will use nothing else. Concerning them Mrs. Charles Hunt, Tuncosh Island, N.S., writes: "I have ten children, the baby being just six months old. I have used Baby's Own Tablets for them for the past 20 years and can truthfully say that I know of no better medicine for little ones. I always keep a box of the Tablets in the house and would advise all other mothers to do so." Baby's Own Tablets are sold by all medicine dealers or will be mailed upon receipt of price, 25 cents per box by Dr. Williams' Medicine Co., Brockville, Ont.

## Recipes For This Week

(By Betty Barclay)

**Cardinal Gelatin Salad**  
1 package lemon-flavored gelatin.  
1½ cups boiling water.  
½ cup canned beef juice.  
1 cup celery, shredded.  
1 cup beets, diced.  
½ cup Spanish onion, cut fine.  
1 green pepper, shredded.  
1 teaspoon salt.  
Dissolve gelatin in boiling water. Add beef juice. When cold, add celery, beets, onions, green pepper and salt. Pour into individual molds. Turn out on lettuce, serve with Mayonnaise dressing. Serves eight.

**Fifteen-Dollar Pie**  
½ cup sugar.  
2 tablespoons flour.  
1½ tablespoons melted butter.  
Juice 1 lemon.  
1 egg yolk.  
½ cup milk.  
1 egg white.  
Few grains salt.  
Mix sugar and flour, add melted butter, lemon juice, egg yolk slightly beaten, milk, egg white stiffly beaten, and salt. Bake in one crust, and cover with meringue or not, as desired.

A pleasant medicine for children is Mother Gravel Worm Expeller, and it is excellent for driving worms from the system.

Edinburgh is to be commended on its decision to sell its relics of the Great War, and give the money to charity. Better that children should have food and clothing than have machine guns to play with.

For frothing use Mianard's Lullaby.

## ASPIRIN

Headaches may be swiftly and safely relieved by an Aspirin tablet. A most efficient remedy, and there's no after effect; its use avoids much needless suffering. Try it next time; see how soon its soothing influence is felt. Just as helpful when you have a cold; neuralgia, neuritis, rheumatism, lumbago. Just be certain you get real Aspirin—the genuine has Bayer on the box, and on every tablet. All druggists, with proven directions.

## Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark registered in Canada. Initiating Bayer Manufacturers. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitation, the Tablets will be stamped with their "Bayer Cross" trademark.

## Experimental Farm For North

Establishment In Meadow Lake District Has Been Approved

Of interest to the settlers in the far north of the North Battleford federal constituency is the news that the federal department of agriculture has sanctioned the establishment of an experimental station at Meadow Lake. The farm will be selected, and will be put in operation during the coming summer. The telegraph line built this year, linking up the 53 mile stretch between Meadow Lake and Loon Lake is now in operation, and is already proving a boon to the people in this remote part of the province. With better farming facilities and improved conditions for the settler, a development of the agricultural possibilities is expected, resulting ultimately in improved railway and highway service.

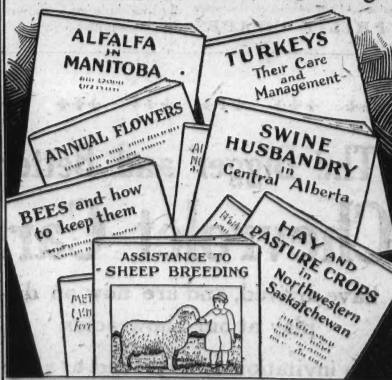

Carols were first sung in the thirteenth century.

## Fur Farming In Alberta

The growing importance of the fur farming industry in Alberta is indicated by the importation recently of a shipment of 20 pairs of silver foxes from ranches in the Maritime Provinces. These animals, valued at \$25,000, were consigned to the National Silver Fox Club at Morinville, a newly organized firm which plans to engage in fox breeding on a large scale.

**"Buckley's"**  
for Throat Health  
A slight and morning relieves soreness and hoarseness, and prevents more serious developments. A bottle of Buckley's—does for it all—keeps an economical guarantee of healthy throats for the whole family. Pleasant to take—instant in action—positive in result. All druggists sell it.  
W. K. Buckley, Limited, 233 1st Street, St. Louis, Mo.  
**BUCKLEY'S**  
NATURE  
Act like a flash—A single sip proves it.

## Sale Of Forest Products Is Big Factor In Keeping Trade Balance With U. S.

Canada's far flung line of forest industries stands out as perhaps the most striking feature of the Dominion's industrial landscape.

Only when one realizes what an enormous volume of commerce these forest industries support, and what a dominant role they play in keeping Canada's trade with the United States on a fairly even keel, can one clearly appreciate what a huge stake the Canadian people have in forest production.

These hundreds of mills together form the main supporting pillar of Canada's export trade with her neighbors to the south. The mounting sales of forest products alone have enabled the Dominion in recent years to keep her trade with the United States from becoming altogether lopsided. Last year Canada sold to the United States roughly \$242,000,000 worth of

wood and paper products, this class of goods representing more than half of the total value of our exports to that country.

How long Canada can continue to export forest products at such a rate is a question which few persons would care to try to answer, for there is a pretty unanimous agreement that the Dominion's forest resources are being steadily and rapidly depleted. In the light of this situation, efficient forest protection and management must take rank as one of Canada's commanding problems. It is a question which commands the active concern not merely of those who find employment in forest industry, or of those whose capital is invested in that field, but of every individual and institution interested in seeing that the Dominion's commercial position is maintained on an even keel.

## Television and Radio New Perfected Device Makes It Possible To Both See and Hear Performers

The magic wand of science, passing over the factory of the General Electric Company, at Schenectady, N.Y., disclosed to a small group of radio engineers, scientists and newspapermen, a vision of the future of radio broadcasting—a future designed to bring to broadcast fans the sight as well as the sound of the radio performers.

Sitting in comfortable chairs in three Schenectady homes, several miles from the company's broadcasting studio, the visitors were enabled both to hear and see the studio program.

Simple twists of the dial on the home television sets brought to these men the minute reproduction of the characters who appeared before the microphone, even to the curl of cigarette smoke from their lips and the blinking of their eyes.

The sound of their voices was heard in the usual way through a loudspeaker supplementing the visual apparatus.

## Canadians Are Urged To Turn Their Gaze Northwards For Great Future Developments

The map of Canada is gradually being unrolled Northwards, and bit by bit the secrets that have hitherto lain hidden in that vast empire to the north of the 60th parallel are yielding themselves up to investigation and research.

It is only within the last few years that Canadians have definitely turned towards the great possibilities for expansion of the Northland and have satisfied themselves that the popular belief that the Northern areas of their country are barren and uninhabitable is, like most popular beliefs, utterly erroneous. With a quiet determination they have tackled the problems of exploring and exploiting the territories beyond the 60th degree of latitude, and have within the past year committed themselves to spending many millions of dollars to development work in that part of the continent.

The establishment of post offices, police posts and customs houses in the Northern islands off the Canadian mainland has been steadily pursued; the most Northern administrative post in the world is that of the Royal Canadian Mounted Police at Bache Bay, on Ellesmere island, 700 miles south of the North Pole. There is no end to the surveys that are being carried out among the islands themselves and to the investigations conducted into every feature, geographical and biological, that these islands contain.

Coming nearer to civilization, Canadians are seen creating for themselves new transportation routes and new outlets to the ocean. At the moment an "expeditionary force" of flying men are operating in the Hudson Straits, that spacious channel which connects the inland ocean, Hudson's Bay, with the Atlantic.

This force has for its duty the making of observations in daily flights over vast expanses of water in order to note the tidal conditions, currents, prevailing winds, ice and all other elements that enter into navigation. Three air stations are located in the straits, one at Port Burwell at the extreme point of the Labrador Peninsula; the second, at Wakeham Bay on the south shore and midway up the straits, and the third at Nottingham Island, in Hudson's Bay itself, at its western entrance.

Day after day flights are made and reports transmitted by wireless to the Canadian government.

The whole idea behind this is that the government should possess all information as to how navigation can be lengthened, for through the Hudson Straits have been navigated for three hundred years and at one time were the main highway to the Canadian West in the days of the old fur-trading companies, the development of the southern lanes of traffic left that route far behind.

Linked up with these investigations is the definite effort now being carried out to finish the Hudson's Bay railway—a line which will when completed, run from a point in Saskatchewan, near the Manitoba border, to Fort Churchill on Hudson's Bay.

As originally planned the road was to end at Port Nelson, but an exhaustive investigation into the merits of the two terminals resulted in Fort Churchill being decided on. It will lengthen the railway by nearly 100 miles, but the report of engineers who made a study of the situation indicates that Churchill has many natural advantages not enjoyed by Nelson and that, despite the 100 miles of railway building, the expenditure in the end will be smaller.

This line goes right into the heart of the Canadian West, bringing it only a few hundred miles from the sea coast.

Exploration is being pushed forward. At the beginning of this year a small expedition will start out from Ottawa to study the fauna of 15,000 square miles of territory which the government in 1927 set aside as a game sanctuary. This region lies between the Great Slave Lake and Chesterfield Inlet, near the junction of Hainbury and Thelon Rivers. It has been traversed by many exploring parties, but the region is so vast that much remains to be told of it.

Canadian statesmen are urging their compatriots to turn their gaze northwards, and the next few years should witness some great developments in that portion of the American continent.

## Ship Live Cattle To Japan

Forty Head Obtained In Alberta Were In Prime Condition

Shipments of dressed beef in the past or quarter years have been exported to Japan from Vancouver for several years past and consignments of pure-bred and dairy cattle have also been made. But what is believed to be the first shipment of live beef cattle made from Vancouver recently on the steamer *Erskine* by the Vancouver Livestock Exchange. The shipment consisted of 40 heifers, averaging 1200 lbs. each, which were obtained in Alberta, if being found impossible to get them in British Columbia. The animals, which will be slaughtered on arrival at Kobe, were in prime condition, but, never having had a rope on them since they were branded; the longhairs had a lively time getting them on board and tied up in their stalls.

## Reindeer Industry

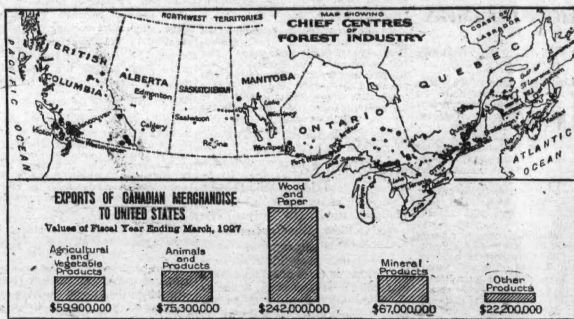

Company Leases Big Area In McKenzie River Territory

Reindeer meat may find its way to the dining rooms of Western Canada if the plans of the Dominion Reindeer Company are successful. This organization, which is now actively engaged in the reindeer business in Alaska, is moving 4,000 fawns in the spring to a lease of 300,000 acres in the McKenzie River territory, which is being granted by the Federal Government. It is estimated that sales of reindeer meat in 1929 will be \$9,000, increasing to \$45,000 in the following year.

## An All-British Airship

An airship firm here announces its intention of building a machine which it is hoped will be the first absolutely all-British airship to land in Canada. It will be able to carry 30 persons in addition to a crew of six or ten. Its flying range will be 1,000 miles. It will compass the Atlantic by calling at the Azores.

## Plan Industries Fair

Everything Made in Great Britain Will Be Exhibited

Almost everything Great Britain makes, from huge electrical equipment for a power house down to the faintest jewelry, will be seen at the British Industries Fair, which is to be held simultaneously in London and Birmingham from Feb. 29 to March 2, 1928.

The aim of the organizers is to make each section thoroughly representative of its own branch of British industry and to establish the fair more firmly as an annual commercial event of first class importance—the manufacturer's means of launching new products and establishing new contracts, the trade buyer's means of keeping in touch with the latest developments in British production and of taking a complete survey of that section of it which interests him most without having to make a tour of the country.

## When a Sparrow Falls

Save the Birds and Destroy the Insect Pests

According to scientists, we are now on the verge of a struggle between the insect world and mankind. If each insect born lived until its natural death, it would not be long before fields and woods would be bare and our source of food gone.

One bird devours hundreds of insects in a day, and millions in a lifetime. Millions of birds devour—well the problem is too difficult to solve, but at any rate, they enable us to overcome the insects that remain.

Worth remembering, isn't it? Particularly when the rifle of the small boy is pointed toward one of our feathered friends.

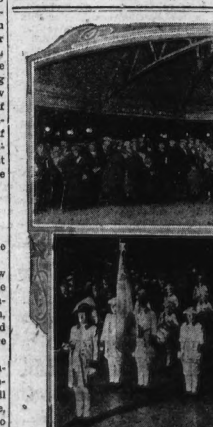

## German Sub Discovered

Sunk in the Baltic off Window Harbor, when they came into collision during the war, two German submarines, from which there were only three survivors, have been discovered by fishermen. The latter have recently hauled in their nets portions of the wreckage and six skulls and other bones. Divers have been sent down and have reported the submarines to be apparently little damaged.

A sea can jump 200 times the length of his body.

## Ensures Safety

The trains on the Paris underground railways are being fitted with an ingenious invention by which it will be impossible for them to leave to station unless all the doors are closed and locked. No signal to start will be given by the guard; he will simply press a button. Unless everything is in order the electric motors will not respond to the starting handle.

## West Pays Visit To East

More and more every year Canadians are exploring Canada. From the East—Montreal and Toronto—the Canadian Pacific Railway sends special trains right across the Dominion to Victoria, returning by routes different to those by which the outward journey was taken and thus giving easterners a more thorough idea of the land and cities of the west. In the other direction, from west to east, the flow is almost equally great by reason of the large number of westerners who travel across Canada to take ship overseas for the Christmas holidays, and the "Survivance Française" is a shining different to this. In this case, some hundreds of French-Canadian settlers in the west make the trip back for a week or two to the land of their origin, the Province of Quebec. They arrived at the Windsor Street Station of the Canadian Pacific Railway in Montreal, and from there went to Shawinigan, Sherbrooke and Quebec City, where they were enthusiastically fêted by local organizations, municipal, government and ecclesiastical bodies. Photograph shows this season's party assembled in the Windsor Station just after their arrival in Montreal recently. The lads in white uniforms of the old French regime were a guard of honor drawn up to greet the party and come from a local Montreal school.

## GRADING SYSTEM FOR WHEAT IS UNDER REVIEW

Calgary.—Following a debate during which every phase of the question of grain grading was explored, the United Farmers of Alberta, in convention here, by an overwhelming vote, declared their opposition to the introduction of measures which might result in the lowering of the standard of Canadian wheat on the markets of the world.

Two resolutions were presented on grain grading. One advocated a division of grades to provide for increased moisture content, "tough B" from 15.5 to 17 per cent. It was suggested the spread in price be proportional. The other resolution asking the convention to petition the Government to empower the Canadian Board of Grain Commissioners to allow a certain amount of damaged grain to go into contract grades two and three Northern. Both resolutions were rejected.

Before consideration of these recommendations, the systems of grain inspection and grading now in vogue in Canada were explained in exhaustive detail by J. D. Fraser, chief of the western grain inspection division, and James Robinson, member of the Board of Grain Commissioners.

For nearly three hours the two officials were bombarded with questions from the floor of the convention. They were requested to show how grain standards were set, why wheat from the same field produced wheat of varying grades, the benefits of drying, results of re-inspection, the effect of mixing on the reputation of the Canadian product, and answer a barrage of queries bearing upon the movement of wheat from the time it is shipped to the country elevator until it reaches the export market.

Claims were made that the important task of inspecting the wheat of the country was being placed in the hands of incompetent men who often proved to be "poor guessers." To overcome this objection it was urged inspectors be drawn exclusively from the agricultural population and not from the civil service.

Replying, Mr. Fraser declared all inspectors were required to pass a rigid examination before appointment. Illustrating the difficulty in obtaining suitable men, he pointed out that from a recent list of 56 applicants only 12 had survived the test.

"Trading," Mr. Fraser added, "is primarily a matter of judgment. Naturally every man's judgment is not the same and wherever the human element enters, there is always the possibility of mistakes. In reaching classification of grain inspected, we are solely guided by the terms of the Canada Grain Act and our efforts at all times have been to reach some basis of uniformity."

Mr. Fraser deplored the increasing number of varieties of wheat being produced in the country. Fifteen years ago, he said, when the varieties were fewer, the grade of wheat had been considerably higher than at present. He expressed the opinion that half a dozen varieties would be quite sufficient.

### Television Established

London.—Television already has been successfully established between London and New York, according to L. G. Hutchinson, director of the Baird Television Company. Prior to sailing on the Aquitania for New York, Mr. Hutchinson announced secret experiments had been in progress for six weeks and that recently "contact" with New York was made on several occasions, it being possible to see the faces and hands of individuals although the features were indistinct.

### May Study At Scotland Yard

Winnipeg.—The Provincial Government and the city of Winnipeg are considering sending some senior officers of the provincial and city police forces to England to take advantage of a special course of instruction to be given at Scotland Yard at the invitation of Old Country authorities.

## Spies Are Convicted

Two Men Are Sentenced in Britain For Espionage

London.—An Old Bailey jury convicted two men of trafficking in British official military secrets in the interests of Soviet Russia and dealt a heavy blow to what the prosecution termed "a dangerous spy organization operating against the safety of Great Britain."

Wilfrid Thomas McCartney, variously described as an Englishman and as an Irish-American, and George Hanson, a youthful German, were sentenced to ten years' penal servitude each on their conviction.

McCartney was accused of being the chief spy and Hanson his aide, in obtaining and communicating information useful to opponents of Great Britain in warfare. While admitting that not all those engaged in the espionage organization had been trapped, Attorney-General Hogg declared the activities of the arrested men had been halted before material damage could be done to the country.

Summing up, the Lord Chief Justice said the accused had been convicted of "terrible offenses" and denounced them for trafficking in official secrets for gain, uninspired by any thought of serving their own countries.

## Asks For Wider Powers

Regulations Governing Soldier Cases Not Flexible Enough

Toronto.—As a result of the report of Col. A. T. Hunter, on his recent investigation into the Department of Soldiers' Civil Re-establishment here and in Hamilton, London, Ottawa, and Montreal, the minister, Hon. Dr. J. H. King, will ask Parliament to grant him wider powers in dealing with the cases of the veterans, said the Globe here.

At the present time, it is said, the regulations are not flexible enough, so that in certain exceptional cases hardship is undergone by veterans.

### Would Be a City

Regina.—Formal petition for the incorporation of the town of Yorkton as a city—the eighth in Saskatchewan—has been received by Hon. S. J. Latte, minister of municipal affairs. The petition was signed by Mayor A. C. Stewart and Town Clerk F. J. Pilkington, and accompanied by the usual fee of \$250. The application will receive the consideration of the Lieutenant-Governor-in-Council.

### Resignation Expected

Toronto.—The Evening Telegram says the resignation of Hon. Forster Godfrey, Ontario Minister of Health, from the cabinet is expected shortly owing to ill health.

## WAS WAR ACE

Capt. F. J. Stevenson, war ace, and member of the Ontario Provincial Corps, who crashed to death at The Pas, Man., when his plane nose-dived into the street.

## Want More Prize Money

Would Have Exhibition Boards Boost Prizes For Short-horns

Regina.—Calling upon the Saskatoon and Regina exhibition boards to increase the prize money for the Short-horn classes at the two summer fairs, delegates to the annual meeting of the Sask. Short-horn Club here expressed appreciation at what had been done for them in the past. It is with the desire to encourage the small breeder to show at these summer fairs, that the boards will be asked to increase the money prizes for Short-horn bred and owned within the province.

Jorn Brandt, Edenwald, was re-elected as president, with Mr. A. G. Huggins, Surbiton, as vice-president, and Chas. Harton, Belle Plaine, as secretary.

Reports from the secretary and president indicated that the club is increasing in numbers, and that there is a greater interest in the breed being developed in the province.

No annual sale will be held this coming fall, as it has been found that weather conditions present a large number of breeder-attending.

### Millions For Manitoba

Winnipeg.—More than \$120,000,000 came to the province of Manitoba from the field crops for the fiscal year ending April 30, 1927, according to the annual report of the department of agriculture placed before the legislature by Hon. A. Prefontaine, Minister of Agriculture.

## Liverpool Greet

Canadian Farmers

Miss Cora Hind Replied To Address For Visitors

Liverpool.—The touring Canadian farmers spent 48 hours visiting Liverpool, Birkenhead and other points on the Mersey River, and their visit created considerable interest here.

One Liverpool paper says of them: "They are dressed like Englishmen in their Sabbath best, except for a few who give distinction to the party by wearing fur coats."

The farmers were welcomed on the corn exchange by President Barker, who assured them that Canada's wheat graded as reliably as a bank note.

Miss Cora E. Hind, Winnipeg, replied for the visitors in an address that was replete with information about the Dominion's resources, advantages and progress.

The visitors were received at the city hall by the Lord Mayor, Miss Margaret Beavans. Short speeches were made by many of the leaders in Liverpool's great commodity handling business. Conferences were held in the fruit and general produce exchanges.

The party visited the Liverpool Cathedral, of which, after 50 years building, only a part has been completed, and the complete construction of which may group a century.

## Manitoba Will Adopt

Immigration Scheme

Bringing Boys From England For Placement On Farms

Winnipeg.—The British boy immigration scheme has been adopted by the Manitoba provincial government and about 50 lads will be brought here this year for placement on farms in the province. Hon. A. Prefontaine, Minister of Immigration, has announced.

Temporarily, the boys will be placed at Manitoba Agricultural College where they will receive training to accustom them to farm work.

## New Ruling At Ottawa

Fee Of \$25.00 Now Charged All Parliamentary Agents

Ottawa.—Before a parliamentary agent can appear before the House of Commons to promote or oppose any private bill or petition, he must pay a fee of \$25 and secure the express sanction of the Speaker of the House.

This is contained in a new ruling. Now there are nearly 50 such measures on record and proposals and antagonists alike, aside from members of the House, will have to conform.

## MANY WESTERN MATTERS ARE TO BE DEALT WITH

Ottawa.—Western matters will have considerable prominence in the legislation of the forthcoming session of parliament. There will be a large additional vote for the Hudson's Bay Railway and if the anticipated agreement is reached regarding the policing of Saskatchewan, legislation may be required, although it may be effected by order-in-council. In any event, the subject will be before the House.

Alberta and British Columbia also figure in the seasonal program and in legislation defining the boundaries of national parks in Alberta. An agreement on long standing points of dispute will be sought.

The re-survey of boundaries made in the last few months paves the way. The fundamental interest in the parks which the Dominion proposes to retain will be the scenic beauty, leaving to the province the water powers and minerals to a large degree. The Dominion Government is willing to exclude Spray Lakes and other power from the parks, along with the principal coal fields, providing it is guaranteed against future claims by the province respecting any mineral deposits which may be incidental to the essentially scenic portions of the domain. In other words, it is proposed to establish a new boundary and exclude the villages, water powers and the known mineral deposits, providing the title to the remainder is left inviolate in the Dominion. An agreement along these lines is probable. The measures to be excluded would be held by the Government until such time as the resources generally are returned.

Meanwhile, in regard to the latter question, there are no new developments. Conference on the subject last week between Premiers King and Brownlee are expected to result in a pronouncement one way or the other, which the latter has consulted his colleagues. The Dominion Government as a result of having decided on a constitutional issue finally determined, after which it is prepared to return the resources, but difficulty has been encountered in getting the case before the Privy Council without some new intervention. The obstacle arises from the unusual procedure of the federal government appealing a judgment in its own favor.

In regard to British Columbia's case for better terms, a report from Mr. Justice Martin, who has been in the land, has made it pretty clear that if the lands sought are returned it will not be in recognition of a legal claim but as a matter of equity.

## Served In South Africa

Duke Of Richmond Dies At Home In England

London.—Charles Henry Gordon-Lennox, Duke of Richmond and Gordon, and aide-de-camp to King George, died at his home, Godwood House, Chichester, after a brief illness. He was 82 years old.

The Duke of Richmond and Gordon served as aide-de-camp to Queen Victoria, King Edward and King George. He was a former member of parliament and was a colonel in the Sussex regiment. He was Lord Lieutenant of Elgin and Banff, and had been chancellor of Aberdeen University since 1917.

He served in the South African War and was mentioned in despatches.

### Re-Elected To Presidency

Calgary.—Unanimous demonstration of loyalty was accorded Henry Wise Wood in his re-election to the presidency of the United Farmers of Alberta for the third convention here. The candidature of the veteran leader was not opposed, similarly the United Farmer Women of Alberta expressed their confidence in Mrs. R. B. Gums, who despite protestations, was persuaded to accept the presidency of the U.F.W.A. for another year.

### Beer By The Glass

Toronto.—The Ontario Legislature will open in three weeks, and, according to The Toronto Star, it is possible the question of sale of beer by the glass may be a live issue at the session.

## STUDYING MARKETS IN EUROPE

Farmers and others interested in agriculture in all parts of Canada are members of the Canadian National Railway Farmers' Marketing tour of Europe which is being spread over January and part of February. Of the 68, more than 40 were from Western Canada. This photograph is a portion of the party which left Winnipeg, and includes Ernest Raper, Victoria, B.C., vice-president of the British Columbia Dairyman's Association; Herbert Scott, district agriculturist of the Alberta Government; Sedgewick

of agriculture and colonization. Absent from the photograph because they went in advance of the party, are, among others: Hon. George Langley, former president of the Saskatchewan Grain Growers, and member of the Saskatchewan Government; and D. W. Warner, ex-M.P. of Edmonton. Eastern men making the tour include H. S. Arkell, Dominion Livestock Commissioner and Hon. Walter Lea, minister of agriculture, Prince Edward Island. The tourists will visit Denmark as well as England and Scotland.

## First of New Fleet at Saint John

Saint John Harbour

Completing her maiden trip across the Atlantic, the "Beaverburn" new fast cargo liner for the Canadian Pacific Railway fleet, docked at Saint John, N.B., to receive the official welcome of several officials of that company, among whom were, W. R. MacInnes, vice-president in charge of traffic, and W. A. Wainwright, assistant to the chairman, Canadian Pacific Steamships Limited, also the harbour officials of that port. A thorough inspection was made of the vessel and appreciation of her qualities was expressed.

The "Beaverburn" is the first of five fast cargo vessels, which will be known as the "Beaver" class, displacing 10,000 tons and having a length of over 500 feet. These ships are capable of making the ocean passage in ordinary weather condi-

tions at an average speed of fifteen knots, the "Beaverburn" however, attained a speed of 16 knots on her trial trip.

These cargo ships will provide a weekly departure from Canada every Friday, arriving in London nine and a half days later. Montreal is to be their Canadian port during the summer and Saint John in the winter. The liners are considered the finest and highest class of cargo ships afloat today. Another steamer

of the passenger style, the Duchess of Bedford will be launched at the Clydebank shipyards January 24.

Altogether there are to be five Duchess liners attached to the Canadian Pacific Steamships. To date the Duchess of Atholl has been launched, the Duchess of Bedford will be launched shortly, while in 1925 the third and fourth to be delivered will be Duchess of Richmond and Duchess of Cornwall, with one more ship to come.

## Here and There

Evidence of reconstruction work in Yokohama is seen through the fact that a five storied steel and reinforced concrete hotel was officially opened recently. The building, known as the Hotel New Grand, is of fireproof and earthquake-proof construction and is modeled after the style of the best Canadian hotels.

Toronto.—The Province of Ontario is at the close of the greatest gold producing year in its history, according to officials of the Department of Mines, who forecast an increase in gold production this year of \$2,000,000 as compared with last year's output. In addition, the total mineral production is expected to be more than \$91,000,000—a gain of \$6,000,000 over 1924.

Halifax.—Boys' and Girls' Swift Clubs are now well established here. Calf Feeding Clubs are also on the increase and it is expected that in 1925 the latter will attain the same number in the province as the former. Egg marketing circles are also being organized and much good work is already reported. These should prove a valuable aid to the poultry industry.

Preparations for the Banff Winter Carnival, to be held February 4-11, are well under way. Canadian mushers are training and intend to make a strong effort to bring back to Canada the "Strongheart Trophy" which was carried to the United States by Warren Cordingley, of Ashton, Idaho. It is anticipated that there will be several teams from the United States competing again this year.

Saint John.—An epoch in the transportation of cargo between Canada and the United Kingdom was feted here recently when W. R. MacInnes, vice-president in charge of traffic of the Canadian Pacific Railway, W. A. Wainwright, assistant to the chairman, with other officials of the railway, inspected the C. P. fast cargo liner "Beaverburn" which recently docked here, completing her maiden voyage.

According to a report covering the activities of the past year of the Canada Colonization Association, a subsidiary of the Canadian Pacific Railway, 628 families, consisting of 3,448 persons, were settled on 192,362 acres of land by the association. The value of these transactions is in excess of \$6,000,000. Nearly 300,000 acres of land are ready for settlement and prospects for the current year are very bright.

Vancouver.—In an address before the Board of Trade upon the services rendered the Dominion by the late Sir William Van Horne, founder of the city of Vancouver and president of the Canadian Pacific Railway, C. A. Cotterell, general superintendent of the railway's British Columbia district, said: "The Canadian Pacific Railway is the largest taxpayer and the largest purchaser in the province; it spent last year \$20,750,000 in stores and supplies, taxes, wages, etc."

GOOD NEWS "Without money and without price"

"THE KINGDOM OF HEAVEN AT HAND"

Tens of thousands of churches are without ministers not understanding the great need of preaching the Gospel

"There is a demand for the Gospel in every land"

free The people need the Gospel as never before. Will you do your part? The International Bible Students Association will supply Ministers of the Gospel free of charge in application. Conditions: Open the church building, don't ask for free, take no collection. ADDRESS: G. A. Ware, 5 Conwell Block, Edmonton or I.B.S.A. 270 Dundas St W. Toronto, Ont

## Stony Plain and District.

Mr Roy Alton returned on Sunday from a business trip to Melville, Sask.

Mrs Odenbach left Monday for Leduc, where she is running a school for dressmakers.

Messrs Fred Litzenberger and Rudolf Hoffman arrived back in Stony on Saturday with a carload of work horses.

The local Highland Brigade, their adherents and admirers, marched in to the City yesterday, to participate in the tribute to Auld Scotia's bard, Bobbie Burns. A goodly percentage of the participants were able to return to their homes at the close of the festivities; and all places of business in Stony today are open for business as usual.

A Chevrolet Chassis demonstration will be held in Wudel hall tomorrow (Friday) afternoon Jan. 27. Movie pictures of a very interesting nature will be shown. The demonstration on the chassis will be given by a staff of men from General Motors, to which the public in general is invited. At the close of the demonstration a draw for prizes will take place. The draw will be free to all those present.

Mary, the eight months old child of Mr and Mrs George Swerdon, of Golden Spike, died on Friday, the 20th, from convulsions. Funeral took place on Monday, the 23rd.

At the Meisner sale last week the machinery offered brought a good price. The bidding on the cattle was rather draggy, the best cow selling for \$65. Good horses brought up to \$140 apiece.

Auctioneer Zucht held a successful sale yesterday on the H Enders farm, south of town; the prices obtained being well up to expectations.

W A Pollock, of Heatherdown, was a winner with his potato display, last week, at the Provincial Seed Fair, Calgary. He won with certified Cobblers.

M M Mecklenburg, the well-known optical specialist, will be at the Royal Hotel, Stony Plain, on Friday, January 27th. See him and see well.

## Spruce Grove News

The annual meeting of the ratepayers of Spruce Grove municipal district is billed for Saturday, Feb. 18, with election day Feb. 25.

Rev C Keenan, pastor at St Joseph's church, holds services at Tomahawk next Sunday.

The Spruce Grove Peace Walther League is giving the old entertainment over again, with a few new numbers added to it. It will be held in Schwindt's hall tomorrow, Jan. 27, at 7.30 p.m.

The Soldier Settlement Bd. yesterday held a public sale, 1 mile east of the Graminia Schqol, of the stock and machinery formerly held by T Poulus and John Jones.

DANCE!

HOLBORN HALL

Tuesday, February 14.

## Duffield Doings.

On Tuesday, Jan. 17th, a double wedding of interest to Duffield people took place at Sacred Heart church, Edmonton, when Lawrence Perry (son of Chas. Perry) was united in marriage to Miss Teresa Solal of Edmonton; and Anna Perry was united in the holy bonds of matrimony to Raul Goguillot of Rochester, Alta. The ceremony was performed by Rev M J O'Gorman, of Sacred Heart Church, assisted by Rev Chas Keenan of St Joseph's church, Spruce Grove. Mr and Mrs Perry will reside at Cherhill. Mr and Mrs Goguillot will reside at Rochester.

The death occurred on Saturday morning last of Mr Chas Perry, at his residence south of Duffield. The remains were taken in, Monday morning, to Edmonton for burial there.

The curling rink at Duffield opens tomorrow, the 27th. Proceedings will start with a moccasin dance. Tyrrell's orchestra supplying the music.

The local beer parlor opened on Friday last. There was a good attendance.

## A Promise More Than Kept.

When the publishers of the Family Herald and Weekly Star of Montreal two years ago announced that the owner of the paper wished them to reduce the subscription price from two dollars to one dollar a year, they promised that not a single feature of the paper would be eliminated, but new features would be added, and the paper made more valuable than ever. It is frankly admitted by their million readers that their promise has been more than fulfilled, and today The Family Herald and Weekly Star at one dollar a year is the marvel of the newspaper world. No home in Canada would regret this investment. Just think of a great big 72 page publication at less than two cents per week, and every page of it alone worth the money. No wonder the Family Herald and Weekly Star has over a million readers. It deserves them all, and more too.

17—Playlet at the Muir Lake Schoolhouse.  
18—Nomination meeting for Inga Councilors.

## Getting Things Mixed.

A Western editor received two letters one morning. One man asked how to get rid of grasshoppers, and the other wanted to know how to keep his twin babies from crying all night.

The editor answered them promptly, but is now minus two subscribers.

The father of the twins received the reply, "Cover them in straw and set it afire. The pests after jumping in the blaze will soon settle down."

The man who was troubled with grasshoppers got the reply, "Rub their gums gently each day. Give them plenty of nourishment, and with careful nourishment they will get along fine."

## Railway Time Table.

Going east—Every morning at 5.45. Mon, Wed., and Sat. at 6.55 a.m.  
Going west—Sun., Tues., Friday at 1.29 p.m. Every midnight at 24.24.

**Peck's**
